

Agile Methodologies & Scrum Framework

2-Week Intensive Training Program

Course Overview

This intensive, hands-on program provides a practical immersion in Agile principles and the Scrum framework. Through a simulated project, you'll master backlog management, effective Scrum events, and foster continuous improvement to deliver value faster.

Duration: 2 Weeks

Format: Online/physical (Interactive Workshops + Full-Project Simulation)

Who Should Attend?

- **Project Managers** – To transition from traditional to Agile project leadership.
- **Team Leads & Developers** – To excel within a Scrum team.
- **Product Owners & Business Analysts** – To effectively manage requirements and value delivery.
- **Anyone new to Agile** – To gain a foundational, practical understanding.

Key Learning Outcomes

- **Master the Agile Mindset** – Embody the values and principles of the Agile Manifesto.
- **Implement the Scrum Framework** – Confidently execute the roles, events, and artifacts of Scrum.
- **Facilitate Scrum Events** – Lead effective Sprint Planning, Daily Scrums, Reviews, and Retrospectives.
- **Manage Product Backlogs** – Write effective user stories, estimate effort, and prioritize work.
- **Improve Team Dynamics** – Foster collaboration, transparency, and accountability.
- **Drive Continuous Improvement** – Use Agile metrics and retrospectives to boost team performance.

Sample Modules

Week 1: Foundations & Core Scrum

- Understand Agile principles and Scrum's 3 Pillars.
- Define Scrum roles (PO, SM, Dev Team) and responsibilities.
- Lab: Execute initial Sprint Planning and Daily Scrums for the simulation.

Week 2: Advanced Scrum & Continuous Delivery

- **Hands-On Labs:** Master Product Backlog, User Stories, and facilitate Reviews/Retrospectives.
- Full Scrum Project Simulation: Work through multiple sprints, adapting and delivering increments.
- Explore scaling Agile and present project strategies.

Training Methods

- Extended Project Simulation: Multi-day immersive experience.
- Interactive Workshops: Collaborative exercises.
- Role-Playing Scenarios: Understand Scrum roles.
- Real-World Case Studies: Learn from transformations.

Why This Course?

- **Deeper Learning by Doing:** Skills internalized via extended simulation.
- **Team-Oriented Immersion:** Build cohesion and shared Agile language.
- **Practical Tools & Techniques:** Leave with immediate implementation tools.
