

Advanced Microsoft Office for Professionals

2-Week Intensive Training Program

Course Overview

Master **advanced Excel, PowerPoint, and Word** for enhanced corporate productivity. This practical program focuses on powerful, time-saving features to efficiently analyze data, create impactful presentations, and produce professional documents.

Duration: 2 Weeks

Format: Online/physical (Hands-On Labs + Problem-Solving Challenges)

Who Should Attend?

- **Administrative & Executive Assistants** – Automate tasks.
- **Analysts** – Deepen data skills.
- **Managers & Team Leads** – Create compelling reports.
- **All Professionals** – Boost efficiency.

Key Learning Outcomes

- Excel Mastery – Analyze data with PivotTables, Power Query, XLOOKUP.
- Compelling Presentations – Design with Slide Master, advanced animations.
- Efficient Documents – Structure with styles, templates, mail merge.
- Data Visualization – Create charts and dashboards.
- Process Automation – Use basic macros and Office Scripts.
- Seamless Integration – Link data across applications.

Sample Modules

Week 1: Advanced Excel & PowerPoint Fundamentals

- Mastering Excel functions (XLOOKUP, INDEX/MATCH).
- Data cleaning, structuring, and building dynamic dashboards.
- Introduction to Power Query, What-If Analysis, and basic Macros.

Week 2: Advanced PowerPoint Design, Word Automation & Integration

- Creating corporate templates and advanced animations in PowerPoint.
- Managing complex Word documents with styles, mail merge, and forms.
- Linking data across Office apps for live updates and collaborative features.

Training Methods

- Problem-Solving Labs: Fix inefficient files.
- Real-World Scenarios: Task-based learning.
- Before & After Demos: Visualize efficiency gains.

Why This Course?

- **High-Impact Skills:** Immediate productivity gains.
- **Practical, Not Theoretical:** Hands-on labs.
- **Beyond the Basics:** Become a power user.
